

## Patient Report

Appointment recordLocation

CPR number: 3101641111

Full name: Gerladina Jasmin

Date of issue: 2021-06-26, 19:20

Nykøbing Falster, 4800

Fjordvej 15

## General comments &amp; Additional information

Clinical info: BOOKED

## Ordered Items

SARS-CoV-2, PCR

| TESTS              | RESULT | FLAG     | UNITS | REFERENCE INTERVAL | LAB |
|--------------------|--------|----------|-------|--------------------|-----|
| SARS-CoV-2,<br>PCR | BOOKED | Abnormal |       | Not<br>Detected    | 01  |

We are UNABLE to reliably determine a result for the specimen due to the inconsistent amplification of all of the required SARS-CoV-2 components from the specimen submitted. If clinically indicated, please recollect an additional specimen for testing. This nucleic acid amplification test was developed and its performance characteristics determined by LabCorp Laboratories. Nucleic acid amplification tests include RT-PCR and TMA. This test has not been FDA cleared or approved. This test has been authorized by FDA under an Emergency Use Authorization (EUA). This test is only authorized for the duration of time the declaration that circumstances exist justifying the authorization of the emergency use of in vitro diagnostic tests for detection of SARS-CoV-2 virus and/or diagnosis of COVID-19 infection under section 564(b)(1) of the Act, 21 U.S.C. 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner. When diagnostic testing is negative, the possibility of a false negative result should be considered in the context of a patient's recent exposures and the presence of clinical signs and symptoms consistent with COVID-19. An individual without symptoms of COVID-19 and who is not shedding SARS-CoV-2 virus would expect to have a negative (not detected) result in this assay.
